

UV / SUN SAFE POLICY

Australia has one of the highest rates of skin cancer in the world with two in three Australians developing some form of skin cancer before the age of 70. Too much of the sun's UV radiation can cause sunburn, skin and eye damage and skin cancer. Infants and toddlers up to four years of age are particularly vulnerable to UV damage due to lower levels of melanin and a thinner stratum corneum (the outermost layer of skin). UV damage accumulated during childhood and adolescence is strongly associated with an increased risk of skin cancer later in life (Cancer Council Australia).

NATIONAL QUALITY STANDARD (NQS)

QUALITY AREA 2: CHILDREN'S HEALTH AND SAFETY		
2.1	Health	Each child's health and physical activity is supported and promoted.
2.1.1	Wellbeing and comfort	Each child's wellbeing and comfort is provided for, including appropriate opportunities to meet each child's needs for sleep, rest and relaxation.
2.1.3	Healthy lifestyle	Healthy eating and physical activity are promoted and appropriate for each child.
2.2	Safety	Each child is protected.
2.2.1	Supervision	At all times, reasonable precautions and adequate supervision ensure children are protected from harm and hazard.
QUALITY AREA 3: PHYSICAL ENVIRONMENT		
3.1.1	Fit for Purpose	Outdoor and indoor spaces, buildings, fixtures and fittings are suitable for their purpose, including supporting the access of every child

EDUCATION AND CARE SERVICES NATIONAL LAW	
167	Protection from harm and hazards

EDUCATION AND CARE SERVICES NATIONAL REGULATIONS	
100	Risk assessment must be conducted before excursions
113	Outdoor space natural environment
114	Outdoor space shade
168	Education and care service must have policies and procedures
168 (2)(a)(ii)	Sun Protection

PURPOSE

To protect all children and staff from the harmful effects of ultraviolet (UV) radiation from the sun.

SCOPE

This policy applies to children, families, staff, management, and visitors of Ashby Out of School Hours Care. To ensure the outdoor environment provides shade for children, educators and staff to minimise unsafe UV exposure.

IMPLEMENTATION

Ashby Out of School Hours Care will work in compliance with the *National SunSmart Program* to ensure children's health and safety is maintained at all times whilst at the Service. This policy applies to all activities on and off site.

MONITORING UV LEVELS

Sun protection is required when UV levels reach level 3 or above. Our Service will monitor the UV levels daily through one or more of the following methods:

- using the smartphone [SunSmart app](#) available at iTunes App Store and Google Play store
- using the SunSmart widget on the Service's website available at www.cancer.org.au
- viewing the Bureau of Meteorology website <http://www.bom.gov.au/>

OUTDOOR ACTIVITIES

The sun protection measures listed are used for all outdoor activities during the daily local sun protection times, when the UV Index is 3 or above. The sun protection times are a forecast from the Bureau of Meteorology for the time of day UV levels are forecast to reach 3 or higher. At these levels, a combination of sun protection is recommended for all skin types.

Ashby Out of School Hours Care will use a combination of sun protection measures (see below) **whenever UV Index levels reach 3 and above.**

Sun Protection Times

VIC Mid-August to the end of April

Active outdoor play is encouraged throughout the day all year provided appropriate sun protection measures are used when necessary.

SHADE

Management, Nominated Supervisor will ensure:

- sufficient natural, portable, or man-made shade is provided, particularly in high use areas
- shaded areas will be used for play experiences
- children who do not have appropriate hats or outdoor clothing are required to choose a shady play space or a suitable area protected from the sun and not move to unshaded areas of the playground
- children will still be required to wear hats, protective clothing, and sunscreen if playing under natural or portable shade

HATS

Educators, children, and visitors are required to wear sun safe hats at all times they are outdoors. Cancer Council Australia describes sun safe hats as:

- Hats that protect a person's face, neck, and ears, which include:
 - a legionnaire hat – the front peak and flap should overlap at the sides and the flap should cover the neck
 - a bucket hat with a deep crown and angled brim that is size of at least 5cm for young children and at least 6cm for adults and must shade the face, neck, and ears
 - a broad brimmed hat with a brim size of at least 6cm for children or 7.5cm for adults. The brim should provide shade for the whole face.

Please note: Baseball caps or visors do not provide enough sun protection and therefore are not recommended.

- Children without a sun safe hat will be asked to play in an area protected from the sun *or* they may be provided with a spare hat if available at the OSHC Service.

SUNSCREEN

As per Cancer Council Australia recommendations:

- staff and children will apply SPF30 or higher broad-spectrum water-resistant sunscreen 20 minutes before going outdoors and reapply every 2 hours or more frequently if washed or wiped off
- where children have allergies or sensitivity to the sunscreen, parents are asked to provide an alternative sunscreen, or the child is encouraged to play in the shade.

RISKS OF SUMMER PLAY

Australia has a hot climate and inevitably playground equipment and surfacing can heat up rapidly and retain heat. Many playground surfaces and equipment can exceed temperatures greater than 50°C and if young children come into contact with these surfaces, they can be burned severely within seconds.

The Approved Provider, Nominated Supervisor and educators will:

- use their hand to test surface temperature and make an informed decision about permitting children to play on equipment or in the outdoor space. If the surface temperature is determined to be too hot or is recorded as at or above 50°C it is recommended by Kidsafe Australia that children do NOT play on the surface
- ensure children wear shoes when playing in the outdoor area.

ROLE MODELLING AND WORK, HEALTH AND SAFETY

Cancer Council Australia acknowledges that children are more likely to develop sun-safe habits if they are role-modelled and demonstrated by adults around them. Occupational UV exposure is also a WH&S issue. All educators, staff at the OSHC Service will therefore be required to role model appropriate sun protection behaviours by:

- wearing a sun safe hat (see Hats)
- wearing sun safe clothing (see Clothing)
- applying SPF30+ broad-spectrum water-resistant sunscreen 20 minutes before going outdoors
- using and promoting shade
- wearing sunglasses that meet the Australian Standard1067 (optional)
- families and visitors are encouraged to role model positive sun safe behaviour
- monitoring the UV Index Levels

EDUCATION AND INFORMATION

- Sun protection will be incorporated regularly into learning programs
- Sun protection information will be promoted to staff, families and visitors
- The *Sun Safety Policy* will be made available to all educators, staff, families, and visitors of the OSHC Service to ensure a comprehensive understanding about keeping sun safe including appropriate hat, clothing and sunscreen requirements
